CO_2+LIGHT SENSOR
QUICK START GUIDE

AC INFINITY

PRODUCT WARNING

- Read all instructions before installing and using this product.
- When cutting or drilling into a wall or ceiling, do not damage electrical wiring and other hidden utilities.
- This product must not be used in potentially hazardous locations such as flammable, explosive, chemical-laden or wet atmospheres.
- Do not operate this product while its cord is damaged, or if it malfunctions, or has been dropped.

CO_2 READINGS ADVISORY

CO_2

Most plants need over 400ppm of CO_2 to survive, with growth improving as CO_2 levels rise, up to 2000ppm.

Please note that you may observe high CO_2 readings even when not in a CO_2 enriched environment. This is because CO_2 levels can be affected by room size, how well it is sealed, how many people are in the room, and how close you are to the sensor. Indoor CO_2 levels will generally be higher than outdoor CO_2 levels.

POSITIONING THE SENSOR

**LOCATION**
Position your sensor at the canopy of your plant.

Make sure the photocell remains exposed to your light source.
POSITIONING THE SENSOR

HANGING
You may hang your sensor over a tent pole, or tie it onto a tent pole using wire ties.
WALL MOUNTING

Secure the anchor into your wall. Twist the wood screw into the anchor.

Hang your sensor onto the wood screw using the mounting hole located on its backside.

CONNECT TO YOUR CONTROLLER

Plug your sensor into the first sensor port if no other sensors are plugged in.

Only one CO_2+Light sensor may be used per controller at a time. Use sensor splitters (sold separately) to pair additional ones.

PROGRAMMING

Visit our website for controller programming.

Only compatible with specific controllers.

To set up automations and alerts, download the app.
